## Key Code

<b>vNext</b>	= Next version of System as per latest Microsoft release indicator. This is subject to change depending on latest Microsoft release information.
	= Capita do not Support
	= Capita Support
	= Will be confirmed in future releases of the technical roadmap

# Introduction

The purpose of this Technical Roadmap is to provide customers with a detailed overview of any software infrastructure they might need to deploy in order to run the SIMS Product suite. It has been developed in response to and inline with customer feedback to enable Local Authorities, Schools and Academies to effectively plan their future support of SIMS over a two year period.

In the fast moving world of IT and in the current economic climate, it can be difficult to accurately look into the future and this is therefore a working document. It is subject to change based on feedback from our customers and on the support level offered by other companies for their software. It will be updated alongside the SIMS Functionality Roadmap to provide customers with the latest information in a constantly changing environment.

Where possible Capita support is inline with Microsoft support dates. 2012/2013 support dates are indicative only and subject to change.

I hope you find it useful . If you have any feedback please let me have this by email to [technicalroadmapenquiries@capita.co.uk](mailto:technicalroadmapenquiries@capita.co.uk) . We would particularly value any comments you have on the end of support dates in particular.

**Jonathan Wood**  
Technical Product Manager

## Headline News

### Support Dates

Due to the extensive feedback we have received on the SIMS Technical Roadmap we have decided to extend our support dates to give Schools and Local Authorities more time to migrate the latest Microsoft platforms.

Microsoft Vista support will now be extended a further 2 releases until Summer 2013. The last Microsoft Vista compatible SIMS release will therefore be Spring 2013.

Microsoft SharePoint 2007 support is extended throughout 2012 and will be reviewed before the end of 2012.

We have also reviewed our support for SOLUS 2 and have extended use of SOLUS 2 for SIMS deployment until Autumn 2013. The last SOLUS 2 compatible SIMS release will now be Summer 2013.

### Service Pack Support

When a new Microsoft Service Pack is released we will aim to provide support for that Service Pack in the next SIMS release dependent on its availability within our release cycle. Support for the previous Service Pack will be withdrawn within 12 months. For a further update of currently supported Service Packs, please see "SIMS System Requirements Document" under Sticky Items on SupportNET.
